

Green lipstick on the pig?

When it comes to soil pipe and fittings, cast iron doesn't need cosmetics.

The truth is cast iron is not appropriate for special (acid) waste applications. Don't be fooled into thinking that by covering gray cast iron soil pipe with green epoxy paint that it will be transformed into a different product. It's simply putting lipstick on the pig. Stick with cast iron in DWV applications; it's tried and true.
